INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/AU2004/000153

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims 1-30	YES
	Claims NONE	NO
Inventive step (IS)	Claims 1-30	YES
	Claims NONE	NO
Industrial applicability (IA)	Claims 1-30	YES
	Claims NONE	NO

2. Citations and explanations (Rule 70.7)

The applicant's invention resides in the provision of a bi-phasic culture medium comprising a solid phase slope of egg or agar, and a liquid phase containing serum and a peptone.

Novelty (N)

All the documents cited in the ISR are category A only. Claims 1-30 meet the criteria set forth in PCT Article 33(2) for novelty. The prior art published before the priority date does not disclose a bi-phasic culture medium comprising a solid phase slope of egg or agar, and a liquid phase containing serum and a peptone. Therefore the subject matter of these claims is new and meets the requirements of Article 33(2) PCT with regard to the requirement for novelty.

Inventive step (IS)

Claims 1-30 meet the criteria set out in PCT Article 33(3) with regard to the requirement of inventive step because the prior art does not obviously suggest to a person skilled in the art a bi-phasic culture medium comprising a solid phase slope of egg or agar, and a liquid phase containing serum and a peptone. Therefore the subject matter of these claims is not obvious and meets the requirements of Article 33(3) PCT with regard to the requirements for inventive step.

Industrial Applicability (IA)

Claims 1-30 meet the requirements of the PCT with regard to industrial applicability.
